

THE PACK TRAIL

Smart Export Planning & Load Optimization Software

Plan Smarter. Load Better. Export Efficiently.

Export planning involves complex decisions — selecting the right product combination, maximizing container utilization, managing weight and volume constraints, and reducing manual calculations.

The Pack Trail simplifies this process by using intelligent planning algorithms to create optimized export loading solutions, helping businesses make faster and better shipment decisions.

What The Pack Trail Does

- Optimizes product placement and container utilization
- Reduces manual planning effort
- Helps identify the most efficient loading combinations
- Improves shipment planning accuracy
- Enables faster export decision-making

How It Works

1. Add Product & Shipment Details

Enter your order, product, and packing information.

2. Intelligent Calculation

The system analyzes multiple loading possibilities based on constraints.

3. Optimized Export Plan

Generate an efficient loading plan designed to maximize space and improve logistics efficiency.

Benefits

- Accurate Freight Cost Estimation Before Order Confirmation

Calculate expected freight and container requirements before accepting an order, helping you quote accurately and protect margins.

- Maximize Container Utilization

Identify the most efficient loading plan and reduce unused container space.

- Make Better Pricing Decisions

Understand logistics costs upfront and avoid unexpected shipment expenses.

- Faster Order Feasibility Analysis

Quickly evaluate whether a customer order can be executed efficiently before committing.

- Reduce Manual Planning Effort

Replace time-consuming calculations with automated optimization.

- Improve Export Profitability

Take smarter decisions by balancing product mix, shipment capacity, and freight costs.

Designed for Exporters, Manufacturers & Logistics Teams

The Pack Trail brings automation and intelligence to export planning — helping businesses ship smarter.
